**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by PCT publication WO 91/09193.

The PCT publication discloses a skimmer having a net, water jets connected to opposite floating side arms for rotating the skimmer around a central body, and a water jet providing means for shifting and moving the body, as claimed.

3. Claims 4, 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over PCT publication WO 91/09193 in view of Drew or Tuomey.

Claims 4 and 7 differ from the PCT publication in recitation of the shifting means providing intermittent flow to the jets, specified to be a valve in claim 10. It is known to use a valve to alternate flow to water jets in a jet propelled skimmer, as exemplified by Drew and Tuomey. It would therefore have been obvious for one skilled in the art to

add such a system to the jets of the PCT publication, to provide better control over the movement of the skimmer.

4. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over PCT publication WO 91/09193 in view of Flatland, Pansini, Distinti or European patent 936328.

Claim 11 differs from the PCT publication in recitation of a feeler pawl for blocking energy to the delivery means when the device hits an obstacle. It is well known to provide such elements in skimmers and cleaners, as exemplified by Flatland, Pansini, Distinti and the European patent, and therefore, it is submitted that addition of such an element to the device disclosed by the PCT publication would have been obvious for one skilled in the art, to protect the device.

5. Claims 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The recitation of a rotating skimmer of the structure recited in claim 1 with the addition of a distribution element for providing intermittent thrusts to the propelling means in the form of a blade in the water connected to a distribution element for alternately selecting each propelling means patentably distinguishes over the prior art of record.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other references of interest include Gibellina, Weatherholt and Nguyen.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Upton whose telephone number is 571-272-1169. The examiner can normally be reached on 7:30-5:00, off every other Monday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
